¹ Due to lower cleaning and maintenance costs comparing carpet and hardwood and the durability of Bolon flooring the LCCA will give a positiv result.

The LCCA can be calculated per project by a third party and is not something we calculate ourselves.

² Bolon flooring has a long product lifetime during which we offer warranties up to 15 years.

³ Unlike textile, carpet or hardwood, our flooring retains its appearance without flattening.

CLIMATE-NEUTRAL PRODUCT AND PRODUCTION

Sustainability isn't just something we say; it's what we do. We are proud that our sustainability work covers all our products, not just selected niche collections. This means that all our products contain 68% recycled material, with 0% climate impact in every square meter. All our manufacturing takes place in our climate-neutral factory in Sweden.

“Being a budget hotel, we choose durability and quality over cheap, short-lived materials and we want the material to last as long as possible. This will give us a better ROI on the whole project and the operations. The oldest Bolon flooring that we still have is 11 years old now. It’s got wide white stripes in it, and I don’t think there is any other flooring that we could have white in and keep it for 10 years.”

WOVEN DURABILITY

The durable construction in combination with its tactile woven expression and high-end design, makes Bolon flooring and rugs a superior choice for rooms, corridors, lounges and other areas of a hotel.
